SUMMARY

Junior Full Stack Developer with 1 year of experience building applications with Laravel, Node.js, React.js, and Vue.js. Experienced in developing production-ready healthcare and sports management platforms. Passionate about writing clean, maintainable code and solving real business problems.

WORK EXPERIENCE

Full-Stack Developer at Softleed [🔗](#)

July 2025 – Present

Intern (Jul 2025 – Sep 2025)

- Received intensive hands-on training in React, Vue, Laravel, and Playwright.

Full Stack Developer (Sep 2025 – Present)

- Own end-to-end delivery of features across 6+ live projects, including MediConnect, Tracklo, and BaySync.

PROJECTS I CONTRIBUTED TO

MediConnect [🔗](#)

AI-Powered Healthcare scheduling portal – Vite, React, TypeScript, Express, Sequelize, and the Microsoft Bookings API

- Built Staff Panel, Pharmacist Panel, and Admin CRUD pages (clinics, staff, and pharmacists).
- Integrated a clinical booking modal into the Patient Panel with form validation using Formik and Yup.
- Worked on ManageBookingProvider.tsx to synchronize calendars with the Microsoft Bookings API.
- Used IndexedDB for offline data and Axios interceptors for API error handling.
- Helped reduce the manual administrative workload by automating SMS booking alerts via Twilio.

Tracklo (Multiple sub-projects) [🔗](#)

Project management + test automation tools – Laravel, Playwright, Redis, PHP

- Softleed Dashboard: Created database models for projects, test cases, and reports using Laravel Eloquent.
- Taskly: Built a notification system using email and database drivers with Redis queues for background tasks.
- Tracklo_Tests: Wrote the entire E2E test suite from scratch using Playwright, implementing parallel execution and role-based login.
- Worked with WebSockets (Laravel Reverb) for real-time activity logs.

PERSONAL PROJECTS

Propelio (Full-Stack) [🔗](#)

AI-powered client proposal & invoice generator – Laravel 12, Vue.js 3, MySQL, Tailwind CSS, Groq API, Laravel Sanctum

- Developed an AI-powered proposal generator using the Groq API to auto-generate project scope, timelines, and cost breakdowns from client briefs.
- Built a full invoice management system with automated proposal-to-invoice conversion, payment tracking, and dynamic status syncing.
- Designed a normalized MySQL schema with Eloquent relationships across clients, proposals, invoices, invoice items, and payments.
- Implemented secure Sanctum-based authentication and policy-driven authorization to scope all agency data per user.
- Deployed the application to production on Railway with a CI-driven build pipeline.

CampaignOS (Full-Stack) [🔗](#)

AI campaign manager – React 19, Node.js, Express, PostgreSQL, WebSockets, Docker, OpenAI API

- Developed an AI-powered creative brief generator using the OpenAI API with Server-Sent Events (SSE) streaming to render live suggestions.
- Built a real-time analytics dashboard with WebSockets and Recharts for live campaign health monitoring.
- Designed a secure PostgreSQL database schema using UUIDs, JSONB, and JWT-based API rate limiting.
- Containerized the entire multi-service application with Docker to ensure consistent deployment environments.

SKILLS

- Laravel
- Node.js
- React.js
- Vue.js
- TypeScript
- Tailwind
- Bootstrap
- Electron.js
- MySQL
- PostgreSQL
- Playwright
- Git/GitHub
